

WELL OPTIMIZATION

Oil and Gas Well Optimization:

- Pumping well evaluation, analysis, and optimization using acoustics and dynamometer testing
- Data logging and secure web data retrieval with state-of-the-art Calscan hawk gauges, in batch downloads or streaming real-time data
- Flow Measurement with Calscan Hawk 9500 – Chart Replacement EFM
- AAWS (Auto Acoustic Well Sounder) – Data retrieval for BHP, fluid, well anomalies, etc.
- Pump off controller sales and service

AER Regulatory Services and Reporting:

- Offset Frac Monitoring
- Surface Casing Vent Tests
- Acoustic Pool Pressure Survey
- Well-Lease Inspections
- Gass Migration Testing
- Packer Isolation Tests
